Dear Dr. Flax:

I would like to express my appreciation to you and your staff and to the organizations that you were able to draw upon for the photographic coverage of the Santa Barbara coastal waters last weekend. I am told by the Interior Department that the photography contains much useful information and I know that the Department's work and the activities of my Panel will be facilitated by having it available.

It is gratifying to me to know that when a national need is identified, our national resources can be brought to bear in such an effective and responsive way.

I would like to congratulate those on your staff who handled this matter so responsibly and expeditiously.

Sincerely,

Lee A. DuBridge
